

Maker

Cake Industries design, engineer, fabricate and make beautiful things; from sculpture, bridges and staircases to cabinetry and pavilions. Working with the finest materials and taking a design-focused approach to all projects, we work with architects, designers, artists and contractors to bring concepts to life.

We are currently looking for a new maker to join our team. We are open to candidates who may not come from a metal-related background but have an understanding of how things are made, what a workshop environment entails, and a desire to learn. We value skills developed through prop building, architectural model making, or cabinet making.

Role

- You will have knowledge and practical fabrication experience with a range of materials and processes which could include metal, **or** timber.
- You will carry out fabrication on a range of projects both in the workshop and on site
- You will be open to learning new disciplines within our metal and timber fabrication shops
- You will uphold high standards of workmanship, demonstrating awareness of quality management across varying projects, and be responsible for quality control of work developed by the team.
- You will have a positive attitude and enjoy problem solving within a creative and collaborative environment.
- You will ensure that that your own work is carried out efficiently
- You will follow the culture of health and safety excellence within our team.
- You will report to the workshop manager and the Directors.

Salary

Based on experience and competence but expected to be in the range £30,000-£35,000, with opportunities for this to grow with the business.

Job Type

Permanent, 5 days a week. A salaried package including annual leave and statutory benefits.

Essential skills

- Minimum of 2 years' experience in a relevant environment
- Knowledge of fabrication in a variety of materials to a good standard
- Experience of using hand tools appropriate to the task
- Excellent communication skills
- Some ability to read and understand engineering drawings
- Some knowledge of and implementation of good health and safety practice
- Exemplary time management and an organised and coherent approach to your work

Desirable skills

- Appropriate certification for welding skills and experience with coded welding
- Experience of timber machining or board material processing
- Use of workshop machinery
- Experience of working both in a workshop and on-site installation.
- Machining or lathe skills
- CSCS Card and/or formal health and safety training
- Valid UK driving licence

Please submit your CV and examples of previous work including contact details for two references to info@cakeindustries.com.

Applicants will be selected subject to an interview and potentially a skills trial over a working day (paid).
